Lead Agency: Washington Department of Fish and Wildlife

The lead agency is providing updated information on this project which may be of interest to other agencies or the public. The updated information provided below does not substantially change the analysis of significant impacts in the existing environmental checklist.

The original environmental checklist dated April 20, 1992 (Final DNS dated May 13, 1992), should be modified to reflect the following additions:

1. The Surfside Canal will be restocked with grass carp to control aquatic vegetation. Additional restocking of Surfside Canal may be necessary at a later date if numbers of grass carp are reduced due to predation or other natural causes.

Based on the original environmental checklist and the updated information provided in this addendum, the lead agency has determined that a new threshold determination is not warranted. There is no comment period associated with this SEPA environmental checklist addendum.
